

WINVaccs is the **Immunisation** module of the **Community Services Suite**. A powerful yet easy to use system which has been specifically developed to meet the needs of those responsible for delivering Immunisation services.

The Immunisation module of the Community Services Suite has been developed to cost effectively address the needs of immunisation providers such as Councils, hospitals, medical centres etc, and is used throughout Australia.

The Health Insurance Commission (HIC) has accredited Xpedite as a Licensed Supplier of Immunisation Software.

Services Australia acknowledged that on 5 January 2022 WINVaccs successfully integrated the Australian Immunisation Register Web Services.

Major features at a glance:

- Efficient entry and storage of an extensive range of Infant/Child/Adult details.
All immunisation sessions display immunisation history recorded and recommended vaccines.
Ease of sending encounters to AIR using the Web Services created by Services Australia
- The Session diary, an essential tool for management of sessions
- Easy to use with coloured buttons, tabs and screens
- Efficiently manage the ordering and dispensing of Vaccines and Consumables to a session date by tracking stock orders, stock on hand, dispensing of stock and stock returns.
- Ability to record Reactions to vaccines and Warnings – easily seen on the screen

- Immunisation - (Lgssedo) - [Person Details - Edwards, Koby]**
